MAINE LOBSTER

PRODUCT INFORMATION

The world wholesale market for lobster is over \$1 billion, yet handling live lobsters presents several problems for users. The Claw Island proprietary SeaLock™ process has alleviated this problem while providing an equivalent dining experience.

REASONS TO BUY CLAW ISLAND LOBSTER

- Claw Island's processing facility is HACCP certified.
- Claw Island's lobsters are fully cooked and individually quick frozen. The presentation is dramatic and reheating is simple.
- Frozen stocks can reduce the swings in market prices and availability that make live lobster pricing difficult.
- There is no live lobster handling. Special tanks, equipment and training are no longer required to manage inventories, thereby reducing actual food costs.
- Claw Island uses the highest standards to grade lobsters in their peak of freshness. The results are great texture and delicate flavor.
- The process is all natural with no chemical additives or preservatives.
- Claw Island's SeaLock™ lobsters have that "just caught" taste. Just thaw and reheat.
